## A Good Life Assisted Living

A Good Life Assisted Living provides support for seniors who need an extra helping hand with their activities of daily living to maintain independence and enjoy a more active lifestyle.

Our staff gets to know each person's interests and needs and takes pleasure in catering to their tastes and preferences—from favorite meals and activities to scheduling events and transportation.

Our staff provides support for seniors who need an extra helping hand with daily activities, such as dressing, bathing, meals, or medication management.

In addition to daily assistance, we develop ongoing assessments to help us adapt our care to each person's specific needs. We communicate regularly to keep families up to date on their loved one's health.
